KIT-ADC-DIGI+
## Refrigerant Certification Kit – All Refrigerants

This kit includes the 5 essential tools required for the F-Gas certification.

TREK-ONE
3/4 hp recovery unit

CORE-550
Bluetooth digital manifold

LT-100-PRO2
Electronic leak detector

THR-110
1-channel digital thermometer

ECS-200
Charging scale

F-GAZ
F-GAS documentation kit

SPECIFICATIONS :

- **TREK ONE Recovery Unit:** Equipped with a 3/4 HP compressor, low-pressure switch, and central control valve for simplified operation.

- **CORE-550 Digital Manifold** : Measures low and high pressure, calculates superheat and subcooling, vacuum mode and pressure test – IP54 housing, supports 89 refrigerants.

- **LT-100-PRO2 Multi-Gas Leak Detector**: Compatible with HFC, HFO, HC, and hydrogenated nitrogen; high sensitivity <3g/year.

- **ECS-200 Charging Scale:** Sturdy with a large platform (27 cm x 27 cm).

- **THR-110 Single-Channel Digital Thermometer:** Delta measurement (T1–T2 differential) and manual calibration. Supplied with 1 contact clamp probe, 1 ambient probe, and 1 carrying case.port.

- **F-GAS Documentation Kit:** Complete kit including required documents and labeling tags for F-Gas certification compliance.
