

PRG-KIT-N2H2

Leak detection and pressure test kit

The PRG-KIT-N2H2 is a complete and professional solution designed for leak detection across all refrigerants used in HVAC-R applications, including HFC, HFO, HC, and hydrogenated nitrogen (N2H2), using the LT-100-PRO2 electronic leak detector. It also enables pressure testing thanks to the included PRG-100 nitrogen regulator, the pressurized hydrogenated nitrogen cylinder, and all necessary accessories.

FEATURES

- Complete, ready-to-use solution
- Ideal for professionals working with multiple gas types
- Easy operation with the universal PRG-100 regulator
- Durable and reliable equipment for intensive use
- Compact and sturdy case for secure transport

SPECIFICATIONS

- LT-100-PRO2 electronic leak detector
- PRG-100 nitrogen regulator
- Adapter for N2H2 bottle
- 2.2 L / 110 bar N2H2 cylinder
- 2,5m yellow hose
- Pressure test gauge
- Rugged transport case
