

MG-250-R32

2-way manifold kit

FEATURES :

- Measures pressure and saturation temperature of refrigerants R32 and R410A
- Central sight glass for real-time monitoring of refrigerant state during transfers (liquid or gas phase)
- Low and high pressure valves (LP/HP)
- Schrader valve on the center port for simultaneous connection of a vacuum pump and gas cylinder
- Durable carrying case

SPECIFICATIONS

- Ø80 mm dry steel gauges, Class 1.6
- Zero-point adjustment screw on the front of each gauge
- Piston valves with O-ring seals
- Valve knobs and bypass body made of aluminum
- Set of 3 CH60-55R hoses: two with 1/4" x 5/16" SAE fittings (red and blue), and one with 1/4" x 1/4" SAE fitting (yellow), all with metal shut-off valves, 150 cm in length
