

**EVOSTEAM®** steam cleaner for air conditioners is specially designed for both indoor and outdoor units. It can also be used for household appliances such as range hoods, refrigerators, washing machines, water heaters, and water dispensers. This device employs the principle of instant high-temperature operation, enabling cleaning without disassembly for air conditioners and kitchen hoods. It effectively removes harmful substances like limescale and rust from water dispensers, water heaters, and other household appliances through a circulation cleaning process.

### FEATURES

- High-temperature and high-pressure steam
- Multiple temperature levels to meet various usage requirements
- LCD touchscreen with voice prompts
- Smart spray gun with one-touch operation
- Adjustable flow: steam, hot water, and cold water

### SPECIFICATIONS

- Voltage: 230V~/50-60Hz
- Pressure: 3-6 bars
- Flow rate: 3 L/min
- Power (hot water) :
  - High : 3300W
  - Medium : 2200W
  - Low : 1100W
- Power (steam) :
  - High steam : 3300W
  - Low steam : 2200W
- Temperature (water) : 60-85°C
- Temperature (steam) : 120-150°C
- Inlet hose length : 1,5 meters
- Outlet hose length : 3,0 meters
- Continuous operation : 3 hours
- Dimensions : 362 x 306,5 x 271 mm
- Weight : 5,5 kg

Smart spray gun with remote controls
